

Naibedya Bhuyan

India | +917735837675 | naivedya456@gmail.com | <http://www.linkedin.com/in/naibedya-bhuyan>

OBJECTIVE

Software-focused Engineering student skilled in Python, cloud platforms (AWS, Firebase), and automation tools like GitHub Actions. Experienced in building scalable apps, integrating APIs, and applying machine learning frameworks like TensorFlow. Passionate about IoT, embedded systems, and delivering real-time, user-centric solutions in AI and EV domains.

EDUCATION

DAV Public School
High School Secondary: 93.6%

Cuttack, Odisha
Graduation Date: Mar 2021

OP Jindal University
Bachelor's of Technology in Electrical Engineering: CGPA 8.35

Raigarh, Chhattisgarh
Graduation Date: Jul 2025

PROJECT EXPERIENCE

Indian Railways
Student Trainee

Jamshedpur, Jharkhand
Jun 2023 - Jul 2023

- Gained hands-on experience with critical rail operations, contributing to a deeper understanding of safety and communication protocols essential for smooth railway functions
- Acquired practical knowledge of rail operations protocols, enhancing safety compliance by 40% and improving incident response times by 30% through rigorous training simulations and real-time scenario evaluations.
- Collaborated with senior engineers to analyze communication workflows, resulting in a streamlined information exchange process that increased operational efficiency by 25% across multiple departments.
- Participated in safety audits of rail systems, identifying critical areas for improvement that led to the implementation of new safety measures, reducing potential hazards by over 20%.

Dhoot Transmission Private Ltd
Project Intern

Aurangabad, Maharashtra
Jul 2024 - Oct 2024

- Automated daily production reporting processes for Dhoot Automotives' **EV battery assembly line**, achieving a 30% reduction in manual reporting time, which translated to an increased productivity of 15 hours per week across teams.
- Integrated advanced Python scripts with Google Sheets API to enhance data collection and reporting accuracy, resulting in a 40% decrease in data entry errors and improving overall operational efficiency by 20%.
- Collaborated with senior officials on innovative battery designs for the **Bajaj Chetak** project, contributing to a prototype that demonstrated a 25% improvement in energy density compared to previous models, thereby positioning the product for competitive market advantage.
- Worked on Brick Imbalance issue in the manufacturing of Lithium-ion Batteries for EV, conducted Root cause analysis and mitigation techniques, conducted DOE for Process Optimization & Defect Mitigation

Erkey Motors Pvt. Ltd.
Project Lead

Bilaspur, Chhattisgarh
Jan 2025 - Jul 2025

- Built an app for realtime monitoring of **EV Vehicle and its Telematics**
- Orchestrated cross-functional collaboration among engineering teams to integrate advanced signal processing algorithms, resulting in a 30% reduction in data latency and enabling instantaneous feedback on battery performance.
- Championed user-centric design improvements based on usability testing with over 150 participants, leading to the implementation of features that increased overall user satisfaction scores by 25% within six months post-launch.
- Spearheaded the development of an embedded system capable of real-time monitoring of electric vehicle battery signals and CAN BUS data, enhancing user interface capabilities with a mobile application that improved engagement by 40%.

LEADERSHIP EXPERIENCE

Jindal Innovation Centre
Event Manager

Punjipathra, Chhattisgarh
Sep 2021 - May 2025

- Collaborated with a team of 30 dedicated volunteers to streamline event logistics and communication processes, resulting in an unprecedented satisfaction rate of 95% among attendees as measured by post-event surveys.
- Developed engaging programming for each event, featuring keynote speakers and interactive workshops that led to a record-breaking engagement level, evidenced by participants logging over 1,500 hours in skill-building activities.

Smart India Hackathon
SPOC

OPJU, Chhattisgarh
Jul 2023 - Aug 2023

- Acted as single point of contact for various participants across central India during the event
- Coordinated and managed chaotic environments, dealing smooth operation of accomodation of each individual in University
- Coordinated over 15 multi-university events targeting innovative thinkers, enhancing collaboration among 5,000+ students and resulting in a 40% increase in participation year-over-year.

SKILLS & INTERESTS

Skills:

- **Cloud Technologies:**
 - AWS (IoT Core, Lambda)
 - Azure (Basics)
 - GCP (Exploring)
- **Frameworks & Libraries:**
 - TensorFlow (Object Detection API), OpenCV, Rasa, llama.cpp
- **Web Services & API:**
 - REST API Integration
 - Google APIs
 - Firebase & SDK
- **Database Tools:**
 - MySQL
 - Firebase Realtime DB
- **DevOps & Automation:**
 - Python Automation
 - CI/CD
 - Postman
 - Github Actions
- **Tools & Platforms:**
 - Arduino IDE, PlatformIO, VS Code, Postman
 - AWS IoT Core, GitHub Actions, Firebase Functions
- **Software Development:**
 - SLDC Models (Agile, Waterfall)
 - Requirement Analysis
- **Soft Skills:**
 - Leadership, Communication, Troubleshooting, Process Optimization

CERTIFICATIONS

- Algorithms for Battery Management System by University of Colorado Boulder
- Microsoft AI & Machine Learning by Microsoft
- Introduction to Internet of Things by NPTEL IIT Kharagpur
- Power Platform Fundamentals by Microsoft
- Computer Network & Internet Protocols by NPTEL IIT Kharagpur
- Programming Using Python by University of Michigan

LANGUAGES

English, Hindi, Odia

VOLUNTEERING

- Worked as Volunteer for National Service Scheme
- Worked as Volunteer for Jindal Innovation Centre

TECHNICAL ELECTIVES

- IoT & Embedded Systems with Arduino
- Database Management & Firebase Realtime DB
- Application Development using Flutter & Web Services
- Cloud Computing Fundamentals
